

**GERCH**GROUP

## **Requirements for building contractors**

The **GERCH**GROUP AG is an intermediate investor and project developer with activities throughout Germany.

**GERCH**GROUP relies on partnerships with executing firms and actively brings the experience of prime contractors into its projects.

We are seeking effective and high-capacity execution partners who provide reliable, first-class construction services.

## **General information**

We generally assign all building activities to general contractors. In addition to major construction firms, we very much like to collaborate with high-performance medium-sized firms. In exceptional cases, we individually farm out tasks such as demolition, earthwork and specific preliminary underground engineering.
