

GERCHGROUP

Requirements for Building Contractors

The **GERCH**GROUP AG is a project developer with German-wide activities.

GERCHGROUP relies on partnerships with executing firms and is keen to benefit from the experience of prime contractors.

We are seeking effective and high-capacity execution partners who provide reliable and first-class construction services.

General Information

We generally assign all building activities to general contractors. In addition to major construction firms, we like to cooperate with capable medium-sized firms. In exceptional cases, tasks such as demolition as well as specific preliminary underground engineering and earthwork are farmed out individually.
