

**GERCH**GROUP

## **Requirement profile for contractors**

**GERCHGROUP** AG is a project developer operating throughout Germany.

The **GERCHGROUP** relies on partnerships with implementing companies and actively brings the experience of general contractors into the projects.

For project execution, we rely on high-performance project partners who provide construction services reliably and in high execution quality.

## **General notes**

Our construction services are almost exclusively awarded to general contractors or partial general contractors for the shell, finishing, façade, building services and outdoor facilities packages. In addition to the large construction groups, we are very happy to work with high-performance medium-sized companies. Individual contracts are awarded in exceptional cases for demolition, early special civil engineering and earthworks.
