

GERCHGROUP

Requirement profile for contractors

The **GERCHGROUP** AG is a nationwide acting project developer.

The **GERCHGROUP** relies on partnerships with executing companies and actively contributes the experience of general contractors to the projects.

For the project execution we rely on efficient project partners who provide reliable construction services in high quality.

General information

Our construction services are almost exclusively contracted out to general contractors or partial general contractors for the following packages: shell construction, finishing, facade, TGA and outdoor facilities. In addition to the large construction groups, we are also happy to work with high-performance medium-sized companies. In exceptional cases, individual trades are awarded for demolition, advanced special civil engineering and earthworks.
